25 YEAR RE-REVIEW

In the event some piece of equipment needed repair, first had to notify company commander of the malfunction. 25X1

The company commander then authorized one of the men of the unit to take that equipment to the Regimental repair shop. Whether or not the equipment was repaired at that shop or sent elsewhere was unknown However, 25X1 every piece of equipment had a form on which the record of maintenance was kept. The information on this form included the part that needed repair, the degree of repair, the repairs made, date of repair and the signature of the maintenance section chief.

Additional Information

25X1

the 9th Company consisted of two officers - Capt. (fnu) ZINCHUK, company commander and Lt. (fnu) KOLUPAYEV, deputy commander and political officer - four sergeants which included one first sergeant, two chauffeurs, and one medical corpsman and 10 enlisted men which included two telephone operators, two radio operators, one cook, shoemaker, administrative man, chauffeur and two guards. Each man had a carbine but they were locked in the company commander's room. They also had two ZIS type trucks and one Willys Jeep.
